

MULTI-PHOSPHORIC NITROGEN

12-40-0

COMPOSITION:

PHOSPHORUS	(P ₂ O ₅)	40% W/V
NITROGEN TOTAL	(RAM 100%)	12% W/V

pH 6

IDENTIFICATION:

Multi-Phosphoric Nitrogen is a liquid product that meets the composition of 12-40-0. It belongs to the D.A.L. group of products. Just like the rest of the products in this group, Multi-Phosphoric Nitrogen is a Dense Liquid Molecular Fertilizer that contains 12 nutritional units of Nitrogen in a Controlled Releasing form and 40 highly assimilated nutritional units of Phosphorus.

APPLICATIONS:

Apply on the soil by the irrigation water and on foliage by sprayings. It is ideal for foliar applications, as it is highly inter-systemic (it has the ability to penetrate into the plant tissues). Therefore, it does not bind other elements, or be binding from other elements.

The product can be combined with all the chemical fertilisers and the common Insecticides- Fungicides- Pesticides- Weed killer.

Provides rapidly to the plant the amount of Phosphorus element it needs and cures any nutritional penury of Phosphorus more effectively and faster than any other form of phosphoric fertilizer.

Apply this product, during the transplanting, for a forceful root system, during the flower formation period and generally for great demands of Phosphorus element.

DOSAGE:

- Spray on foliage, 200 - 300 g/ 100 Litters of water
- Into the irrigation water, 10-40 g/hectare
