

SPEED

SPEED UP YOUR
CULTIVATION !!!

THE SPEED PRODUCT BRINGS THE FOLLOWING RESULTS:

- accelerates the growth of the plant
- forces the blooming
- brings off a premature ripening
- gains an early crop production of high quality
- improves the size, taste and colour of fruits
- It is a product of high nutritional value. It helps the plant to recover from difficult situations, diseases, unsuitable weather conditions (it reinforces the plant against frost).

APPLICATIONS:

You can apply the SPEED product during all the growth stages by spraying on the foliage or through the irrigation water.

Dosage:

- By spraying on foliage, 2-3kg SPEED into 1000Lt of water
- Through the irrigation system mixed with the irrigation water, 10-20 kg SPEED per hectare, 2-3 applications during the various growth stages.

SPEED

SPEED UP YOUR
CULTIVATION !!!

CONTENTS:

MAIN ELEMENTS:

NITROGEN TOTAL (N)	6%
POTASSIUM (K ₂ O)	4%

SECONDARY ELEMENTS:

BORON <u>or</u> ZINC	2%
----------------------	----

MICROELEMENTS:

Boron (B), Cobalt (Co), Copper (Cu), Iron (Fe), Manganese (Mn), Molybdenum (Mo), Zinc (Zn).

BIO ELEMENTS:

PROTEIN FACTOR GT. P-8200 (ACT.PR.)
(FREE AMINOACIDS 33%)

ORGANIC HUMIC FACTOR

HUMIC AND FULVIC ACIDS, etc.

Combination:

SPEED can be combined with all the **chemical fertilizers** and the common **Insecticides Fungicides- Pesticides - Weed killer**. Do not combine it with oil – oily products.
